1. The attached papers appear to be at the moment rather academic and I suggest that [REDACTED] letter be returned to him without any specific comment.

2. There is under way as a separate problem at this time the matter of possible stimulation of research programs in universities from an intelligence standpoint under CIG coordination. IAB agencies have had no opportunity to comment on this project although they were recently requested not to commit themselves to any outside agency on any program for stimulating or supporting external research. This has not yet developed to the point where any discussion with either Colonel [REDACTED] can be engaged in.

3. Thanks for letting us see this information.
